

JITENDRA KUMAR

Vertical Turner Length Operator

jj8976397@gmail.com +91 9916591417 Bengaluru, India

Summary

Dedicated and experienced Vertical Turner Operator with 3.7+ years of hands-on experience in operating lathe machines and shaping iron components with precision. Proven ability to read and interpret engineering drawings, maintain equipment efficiency, and follow strict safety and quality standards. Looking to contribute technical skills and commitment to excellence in a growth-oriented manufacturing environment.

Experience

Meft Technology	Bangalore, India
Vertical Turner Length Operator	09/2023 - Present
- Operating vertical turning machines to shape iron components based on technical drawings and specifications. - Interpreting mechanical drawings and ensuring precise shaping and turning of raw metal materials. - Maintaining quality standards by regularly measuring components and ensuring dimensional accuracy. - Coordinating with the QC team for inspections and rectifying any dimensional deviations. - Routine machine maintenance and ensuring a safe working environment.	
Bhandari Precision Forgings Pvt. Ltd.	Bangalore, India
Vertical Turner Length Operator	04/2021 - 08/2023
- Operated vertical turning lathes to produce forged and machined iron components. - Converted raw metal into finished shapes as per the engineering design provided. - Conducted tool changes, speed settings, and monitored cutting conditions. - Maintained log sheets, ensured timely job completion, and reduced machine downtime. - Followed standard safety practices and contributed to the smooth workflow in the workshop.	

Education

Shersah Suri Inter School - Sasaram, Bihar	
12th Standard	04/2016 - 04/2018
St. Anne's High School - Sasaram, Bihar	
10th Standard	03/2016

Skills

Vertical Turning & Lathe Machine Operation	Technical Drawing & Blueprint Interpretation	Precision Measurement (Vernier Calipers, Micrometers)
Iron & Steel Component Machining	Preventive Maintenance & Equipment Care	Quality Control & Inspection Standards
Workplace Safety & Compliance Procedures	Tool Selection & Cutting Parameters Understanding	Surface Finishing & Tolerance Management

Achievements

Reduced machine downtime by ensuring timely maintenance.	Maintained zero rework percentage for 6+ months through precise machining.	Recognized for meeting 100% daily production targets consistently.
Assisted in training 2 new operators on machine safety and blueprint reading.
