

Here is the code

Copy the code and paste it into n8n.

Key actions

- A form or schedule trigger starts the workflow.
- The workflow scrapes LinkedIn profile, company LinkedIn, last posts, and the company website using Apify.
- A research agent checks for recent news.
- All scraped data gets cleaned and filtered using an AI prompt.
- Another AI generates a personalized cold email and a short outreach video script based on the research.
- The script and screenshot of the prospect's site go to HeyGen to generate a video.
- The workflow keeps checking video status until it's ready and then fetches a shareable link.
- The video preview is formatted into HTML for emails.
- The final output including name, email content, script, and link is saved in a Google Sheet.

          {
            "content": "=Your job is to write a very short personalised email. You are a
world-class email copywriter. You know how to write emails that feel very human and are the
complete opposite from the normal sales and robotic like emails that a business normally
sends.\n\nUse the information provided about the prospect to write an email:\n-Not all the
information provided to you will be good. Determine what content is high quality and use
that. Do not use the rest.\ne.g a LinkedIn post is old or does not seem very relevant\n-The
information you will be provided is their LinkedIn about description, company description, last
LinkedIn post, and recent industry news if they have any\n\nWrite a four sentence
email:\n-Hi {{ $('Execute Workflow').item.json.first_name }}\n-First sentence: Lead with a
personalised compliment. Make this sound very genuine and not corporate at all. Sound
human.\n-Second sentence: Make this personalised about them and their company\n-Third
sentence: Say it would be great to chat about how their company could benefit from AI
automation/agents\n-Fourth sentence: Bring in some personality and a light hearted ending
to the email\n-Sign off the email in a friendly way\n-Add a p.s after the sign off that you think
would be a great addition to the email\n\nCome up with a personalised 4 word max subject
line:\n-Make the subject line personalised to them and linked to the personal content in the
email\n-Don't give too much away in the subject line\n-We want to induce so much curiosity
that they can't help but open the email\n\nRules:\n-This email should sound very human and
personable. \n-No corporate talk\n-Sign off as Ankit\n-Add a line break between each
sentence to make everything easy to read. No big paragraphs. There should be one empty
line between each sentence in the email. This will be outputted in html so make sure the line
breaks are formatted to work.\n\nOutput a JSON with the subject line + the email
body:\n\n{\n  \"subjectLine\": \"\", \n  \"emailBody\": \"\"\n}\n",
            "role": "system"
          }

which should be passed to an email writing AI\n\n# Context\n- A research agent has scraped
a lot of informaiton on a potential prospect.\n-You are going to be given a lot of information
about a prospect like their Linkedin about section, name, date and content of their last
linkedin post, industry news, and website text. \n-Some of this information may be
high-quality and useful when trying to write an email outreach and some may be low quality
and shoud not be considered \n- We want to figure out what could be really useful
information to use and remove any low quality information\n\n\nRules:\n- Evaluate all the
content to determine if it should be kept\n- Do not include the LinkedIn post if it is more than
a month old\n- Remove industry news if none is present\n- Call out what you think is the best
information to use\n- Make this informaiton structured in a succinct

```

way\n\n\nOutput:\n-Output results in a JSON\n-Make all the information appear as separate items so no arrays\n-Only include high-quality content\n-Clearly label the content\n\n",
