

Q. HashMap vs Concurrent HashMap

Q. How HashSet avoid duplicate values in collection.

Q. Iterator and Iterable $\rightarrow$ difference.

Q. How to iterate list?

Q. How to iterate map?

Q. What is fail safe Iterator and fail fast iterator?

Q. How to remove duplicate entries from an ArrayList using stream?

Q. How to add only unique records in ArrayList.

Q. How to compare two collection.

Q. How to sort a collection? How many ways to sort a collection.

Q. How to add a collection in another collection particular index?

Q. How to add only unique record in ArrayList?

Q. Program to retrieve 2nd element of the list from the bucket of Hashtable (Collision)

Q. Program to store and retrieve data from the Hashtable.

Q. Internal working of hash map.

Q. What is Hashcode and Hashing technique.

Q. What is hashcode and equal method.

Q. Comparable and Comparator. diff?

Q. Enumeration and Iterator. diff?

Q. difference b/w Iterator and List Iterator.

Q. Where to use hashmap and where to use hashset.

Q. Where to use linked list and where to use arraylist.

Q. Which data structure followed by hashmap and hashset.

Q. Which data structure followed by list.

Q. Which data structure followed by ~~hashmap~~ list.

Q. How to find the length of the list.

Q. How to remove duplicate element from array.

Q. How to convert arraylist into hashtable

Q. How many ways to sort a collection.
