

CORE JAVA INTERVIEW QUESTION

1. Define JDK, JRE and JVM. (62)
2. Significance of Public Static void main (). (63)
3. Why main method support string[] args ()?
4. Constructor chaining.
5. OOPs Concept (Inheritance, Polymorphism, Abstraction encapsulation).
6. Difference b/w Interface and Abstract Class.
7. Multiple catch Block.
8. Final, Finally and Finalize.
9. Is String inheritable? and how can we create our own inheritable class?
10. Stream API and its uses.
11. How to restrict a class to create only single instance?
12. What is String intern() method used for?
13. What is Runtime Polymorphism?
14. What is the need of creating incomplete methods in Interface?
15. Difference b/w this and super keyword
16. Difference between Java 7 and Java 8?
17. JSP tags.
18. What is constant pool?
19. What is Class Loader?
20. What are access specifiers in java?
21. What is boxing and unboxing?
22. What are the types of memory in java?
23. Why string is immutable?
24. Difference between string, string buffer and string builder. When to use string, string buffer and string builder.
25. What are the new features are there in Java 8?
26. Difference between return and return value?
27. How many types of variables are their java?
28. What is var type in java?
29. What is constructor? How to call parent class constructor in child class?
30. What is Constructor overloading and Constructor chaining and default constructor?
31. What is Functional Interface in java? Can you inherit functional interface?
32. What is Lambdas Expression?
33. What is optional class in Java 8?
34. Why main method is Static?
35. What is Sam (Single Abstract Method) Interface?
36. What is marker interface? What all marker interface are there in Java?
37. What is exception and how to handle exception in java ? Exception hierarchy.
38. Different between exception and error?
39. Can we write try finally without catch?
40. Why to use finally block in try catch? Example.
41. Difference between throw, throws and throwable.
42. How to create custom exception? Write code.
43. Suppose there is three class and each class is independent with each other if exception occur in last class then how to handle it in first clas?
44. Can you write multi catch block?

45. What is serialization? Why we use serialization?
46. What is transient keyword?
47. What is type casting and class casting?
48. Difference between .equals () method and ==.
49. Garbage collection in java.
50. Output: System.out.println(i == j);
51. Difference Between Object oriented programming and procedure oriented programming.
52. Is Java 100% object oriented programming language.
53. Why pointers are not used in java.
54. Functional interface and Lambda's expression. How these two are related to each other.
55. Use of marker interface.
56. What is object class and Which methods are present in the Object class.
57. Difference between abstract class and interface .If there are interfaces present then why we use abstract class.
58. What is serialization and deserialization.
59. What is string? Why it is immutable?
60. between .equals and ==.
61. Java is Pass by value or Pass or reference.
 Ans: Java is always pass by value. During method invocation, a copy of each argument, whether its a value or reference, is created in stack memory which is then passed to the method.
62. Java 8 features.
63. Primitive Data Type Vs Object Data Type.
64. Different logical questions on String (.equals and ==).
65. Occurrence of character in a given string.
66. Find length of the given string.
67. Sorting of Array.
68. Palindrome of string, integer.
69. Armstrong Number
70. Sort an ArrayList.
71. In String find how many time occurrence of characters.
72. Remove duplicate characters from String.
73. First Level Cache Vs Second Level Cache.
74. Difference between primitive and non-primitive data types?
75. What is Constructors and its types and need of constructor?
76. What is SOLID principle with advantages?
 (<https://youtu.be/8i4TaD0s6cs?si=nw-XIW1yVBdimcBE>)
77. What is this keyword?
78. Can we change the visibility of method while overriding If yes then what is condition in it?
79. What are Scanner class and its uses?
80. Difference between While and Switch statement?
81. Difference between continue and break statement?
82. What is volatile keyword?
83. What is string tokenizer?(33)
84. What is anonymous class?

- Types of Anonymous Inner Class in Java. Anonymous inner class that extends a class
- Anonymous inner class that implements an interface

- Anonymous inner class as an argument

85. What is Garbage collector and need of garbage collector in java?
86. Can we overload static method in java.
87. What is data hiding and how to achieve?
88. What is Static block(SIB) and Non-Static block(IIB) in java?
89. What is exception propagation?
90. What are command line arguments?
91. What are executor services.(37)
92. Why java is platform independent language?(63)
93. Why java is not pure object oriented language?(63)
94. Why pointers are not used in java?(40)
95. What are wrapper classes?(63)
96. What is cloning?
97. What is hash code and equal method?
98. What are unary operators and Ternary operator its example? no
99. Difference b/n Enumeration and Iterator.(45)
100. What are association and its type.(45)
101. Explain SDLC model.(62)
102. What are the diff. b/n heap and stack memory in java. (64)
103. Can you override a private or static method in Java?
104. What do you mean by aggregation and composition in Java?(67)
105. What is OutOfMemoryError in Java? (71)
106. Can you call a constructor of a class inside another constructor?
107. How is the creation of a String using new() different from that of a literal?
108. Why is synchronization necessary? Explain with the help of a relevant example.
109. What is an Infinite Loop.(73)
110. What is java String pool.no
111. What is a ClassLoader in java and its Type.(73) no
112. ClassNotFoundException v/s NoClassDef Found Exceptions.(76) no
113. Intermediate and Terminal Operations in stream.(77)
114. Map vs FlatMap.(77)
115. Difference b/w method and construction
116. String pool memory. no
117. Memory of JVM? Heap & stack?
118. What is optional class?
119. Swapping two variables without using third variable.
120. Replace Vs Replace All.
121. What are Enum , Wrapper , optional , local , anonymous.
122. What are inner classes and singleton classes ?
123. What is tokenizer ?
124. What is cloning ?
125. Can we compile code without main.
126. @FunctionInterface sub methods or types. NO
127. Why java doesn't support multiple Inheritance? Explain with examples
128. Where to use abstract class and where to use interface.
129. Why we need constructor in abstract class.
130. Can we override static method What will happen if we try to override static method.

131. Why we use getters and setters method?

132. What is JIT compiler in Java?

133. Programs: - • Sorting of Array

- Palindrome (string, Integer)
- Largest element in an array
- Occurrence of character in a given string.
- Programs related to collection to add elements and iterate them.

Program to count the number of words in string.

A. Explain your rules and responsibilities in current company.

COLLECTION INTERVIEW QUESTION.

1. What is collection?
2. What is Collection framework?(40)
3. Difference between List and Map.
4. Where to use hash map and where to use hash set .
5. Which collection class is synchronized?
6. What we use for manipulation of data and what we use for retrieving of data in collection?
7. Why hashmap is not a part of collection?
8. Why hashmap doesn't follow insertion order if it puts entries as linked list in the node of bucket or index?
9. Where to use linked list and where to use arraylist
10. Which data structure followed by hashmap and hashset , list.
11. What is hashing technique ?
12. What is collision ?
13. ConcurrentModificationException.
14. Which collection concepts u used in your project?
15. HashMap Vs Concurrent HashMap.
16. If we don't override hashCode() method then what will happen.
17. HashSet Vs HashMap. (43)
18. Internal working of HashMap. (43)
19. How HashSet avoid duplicate values in collection?
20. Difference between Array list and Linked list.(43)
21. Difference between List and Set.
22. Difference between Array and Array List.
23. Difference between Vector and Array List.(64)
24. Difference between Vector and Queue.
25. Difference between Hash Set and Linked Hash Set.
26. Difference between Hash Map and Hash Table and HashSet.(43)
27. Difference between Hash Map and Linked Hash Map.
28. Difference between Tree Set and Tree Map.
29. Difference between Comparator and Comparable.(44)
30. Difference between synchronized hashmap and concurrent hashmap? (44)
31. Difference between Iterator and Iterable.

32. Difference between Iterator and List Iterator?(46)
33. Difference between Collection and Collections.(41)
34. What is Iterator?(79)
35. What if two null store in HashMap?
36. How to iterate list?
37. How to iterate map?
38. What is Fail Safe Iterator and Fail Fast Iterator? (46)
39. How to remove duplicate entries from an Array List using stream?
40. How to add only unique records in Array List?
41. What will happen if you don't override hashCode() method and equals() method?
42. How hash table works internally? **no**
43. How to sort a collection? How many ways to sort a collection?
44. How to add a collection in another collection particular index?
45. How to compare two collection?
46. Hashmap and Hashtable.Which one is used for better performance.
47. Program to store and retrieve data from the Hashtable.
48. Internal working of Hashmap.
49. What is Hashcode and Hashing technique.
50. Write a program for reverse of an array
51. Map interface?
52. How sort a list?
53. Explain Collection hierarchy? Explain List, Set and Queue?41
54. Replace Vs Replace All vs Replace First.

A- The replace() method is one of the most used string methods for replacing all the occurrences of a character with the given character. The replace() method of JDK

1.5 replaces the char and a sequence of char values.

B- The replace All () method is similar to the String.

Replace First() method. The only difference between

them is that it replaces the sub-string with the given string for all the occurrences present in the string.

C-The replace First() method is another method for replacing the substring. It replaces the sub-string with the given string. The replace First () method replaces only the first occurrence of the sub-string.

Types of Statements in java?

55. If we don't override hashCode () method then what will happen.

Ans:- If you don't override hashCode() then the default implementation in Object class will be used by collections. This implementation gives different values for different objects, even if they are equal according to the equals() method.

Thread Question

1. What is thread? (35)
2. Explain thread life cycle. What is thread pool?
3. What is multithreading? (35)

4. Difference between thread and process?
5. What is thread join?
6. Difference between wait and sleep.
7. Difference between wait, notify and notify all. (37)
8. What is thread synchronization?
9. What is Demon thread? (35)
10. Difference between thread join and sleep method? (36)
11. Process to create thread and which is best and why?
12. What is thread scheduler? (36)
13. Explain about priority of thread? (36)
14. What is thread pool?
15. What are executor services? (37)
16. Difference between runnable and callable interface? (37)
17. Advantage and Disadvantage of thread? (38)
18. Explain thread life cycle? (39)
19. What is Synchronization? (40)
20. What is Synchronized keyword?
21. Define Threads and its types?
22. What are the two ways to create a thread?
23. Ways to create thread?
24. Explain thread scheduler (wait , notify , notify all , sleep)
25. What is Thread pool , join thread , detach
26. What is difference between thread and multithreading?
27. What is difference between process and threading? Ways to create thread class?
28. Which one is better and why?
29. Difference between join and sleep method? How to give priority to the thread?
30. Explain wait notify and notify all? Why they are present?
31. What is object lock vs class lock?
32. What will happen when calling thread.run() instead of thread.start()
33. Can we call run method before start method?
34. Why we need to override run method?
35. What is deadlock and how to avoid it?
36. What is thread safe? Benefits of thread safe.
37. Process to create thread and which is best and why?
38. Disadvantage of thread?
39. How to make 2 threads run one after another.
40. Lock interface.
41. Why is synchronization necessary? Explain with the help of a relevant example.

SQL QUESTION

1. Foreign Key Vs Primary Key. (61)
2. Delete Vs truncate Command.
3. What is alias in SQL?
4. Joint and Types of Joins.
5. Self-join in SQL.
6. DDL Vs DML.
7. Finding 2nd Max Salary from a table.
8. How to find records of last 10 students.

9. Finding Duplicate Records from table
10. What is Stored Procedure.
11. 2nd and 7th maximum salary.
12. Manipulation Language.
13. DBMS Vs RDBMS
14. SQL Vs MYSQL Vs NOSQL
15. Normalizations
16. Relationship in SQL and its types.
17. How to fetch common records from two tables.
18. How to select unique records from a table.
19. What is index in SQL.
20. What is View in SQL.
21. • What s Cursor in SQL.
22. What are roll back and commit?
23. What are the steps to connect to a database in java?
24. What is the difference between execute, executeQuery, executeUpdate?
25. What are the advantages of Hibernate over JDBC ?
26. Group by & order by?
27. MySQL is RDBMS?
28. Candid key vs unique key
29. Difference between primary key, foreign key & unique key.
30. Jdbc code to connect with database?
31. Types of statement.
32. Normalizations
33. Relationship in SQL and its types.
34. How to fetch common records from two tables.
35. What are the HTTP methods and explain each one?
36. What are joins in SQL and explain each one?
37. What are the aggregators in SQL?
38. Diff between drop, delete and truncate
53. Sql queries like third max salary Joins
55. What are integrity constraints
56. Stored procedures
57. Explain Index
58. How many indexes are there and what are they Composite key
62. Explain group by order by and having clauses, queries based on that
63. Difference between union and union all
65. DML commonds
66. What is TCL and what are the commonds included
67. Difference between hibernate and Mysql
68. Why hibernate over JDBC
69. Write SQL queries ?
70. What are data types of SQL ?
71. What are constrains ?
72. Explain about joins ?
73. Sql queries like third max salary Joins
75. Difference between SQL and Mysql
76. What are integrity constraints

77. Stored procedures
78. Explain Index
79. How many indexes are there and what are they
80. Composite key
81. Explain group by order by and having clauses, queries based on that
82. Difference between union and union all
83. DDL commands
84. DML commands
85. What is TCL and what are the commands included
86. Difference between DDL and DML
87. Difference between hibernate and Mysql
88. Why hibernate over JDBC
89. Difference between Left outer join and Right outer join.
90. IDC
91. SQL queries for insert, update, delete, Truncate
92. MDP
93. Explain all types of joins in SQL with example(query)
94. which is faster inner join or join in sql
95. group by query and some order by query How to add in column in existent table
96. Diff between delete and drop How to update the fat
97. WAP to print emp id name salary input and output Diff Left join and
98. right yml files in spring
99. Write SQL Query to find Second maximum salary in given table. Join in SQL
101. WHAT IS PRIMARY KEY CAN WE CREATE TABLE WITHOUT IT
102. WHAT IS JOINS WHAT ARE THE JOINS AND WHAT IS RIGHT JOIN.
103. HOW DO U ACCESS COMMON DATA FROM TABLES
104. Diff between primary, foreign and unique keys. What are joins why we use joins and types of joins Diff between inner and outer join
105. Diff between left and right join
106. How to increase query performance?Indexing in sql
107. What are the constraint
108. How to join different columns.? Triggers in sal PreparedStatement in sal
109. How to select data in my sql
110. CRUD operation in mysql:- insert, delete, update, etc2nd Max salary in sql (Any max salary too)
111. What is JDBC and write code of JDBC?
112. What in database & why it in required.
113. Examples which your covered.
114. Print the enamel who in having more salary.

115. Built in functions
116. Give me the example of like keyword.
117. 2nd, 3rd max some times 10th max.
118. Sub quires & they ask to find some thing
119. Take your ex & write the query for joins (cgi) & explain joins.
120. joins
121. Types of joins
122. What is the query to find 2nd max or 3rd max or nth max salary in employee table
123. All joins were very important (definition + syntax you should know) (inner, left, right, full)
124. They can ask to write a query for create a table with 4 column names
125. Use of commit and rollback
126. All the keys were very imp (primary, foreien, unique)

Agile

1. Explain SDLC model?
 2. Explain your project briefly
 3. How many user stories you worked on during your project development
 4. How many times you attended Spring retrospective meeting, how many and whom are there in the meeting
 5. How many times scrum meeting you attended, what was discussed in that meeting
 6. How much time you took to complete one sprint
 7. What are roles of srcum master
 8. Size of team
 9. What are Burn down/up charts , have you managed them?
 10. Explain about Agile completely ?
 11. How to retrieve a record from the student objects based on your name
 12. Sql join queries
 13. Explain about Agile completely ?
 14. some company related qstns
- agile methodology
15. What is scrum methodology
 16. Why you chose agile instead of waterfall as waterfallis safe?
 17. What are scrum ceremonies?
 18. HAVE you attended scrum meetings? What you did?
 19. Have you interacted with customers?
 20. What user stories you worked on?What is story points?
 21. Day to day work?Scrum master?
 22. Who did Effort estimation?
 23. What were the sprints in your project?
 24. Explain about Agile methodology?

HIBERNATE

1. What is the significance of Hibernate over JDBC.
2. What is Session and SessionFactory in Hibernate.
3. What is Dialect in Hibernate.
4. Mappings in Hibernate
5. What is lazy Eager Loading in Hibernate.
6. How do we declare multiple primary Key in Hibernate.
7. What is a POJO Class.
8. What Parameter that Repository accepts.
9. What is Hibernate?
10. Hibernate protocol
11. What is ORM?
12. What is HQL?
13. Difference between JPA and Hibernate?
14. Difference between JDBC and Hibernate?
15. What is JPA?
16. What is persistence in Hibernate?
17. What is session in Hibernate?
18. What is session Factory?
19. What is session?
20. Difference between get() method and load()
21. What is lazy loading in Hibernate?
22. How many types of association mapping is there in Hibernate?
23. What are the key components are in Hibernate?
24. What is transaction in Hibernate?
25. Difference between JPA and Hibernate.
26. What is ORM technique
27. Annotations used in Hibernate.
28. Hibernate Vs JDBC.
29. Caching in hibernate.
30. Hibernate Architecture
31. Bean Factory
32. Application Context
33. Get () Vs load()
34. All Hibernate annotations.
35. Lazy Loding vs Eager Loading.
36. Explain Hivernate Internal working.
37. States of Object in Hibernate.
38. What are executor service?
39. First Level Cache Vs Second Level Cache
40. Explain advantage of Hibernate over JDBC?
41. Types of hibernate mapping explain each?
42. Types of inheritance in hibernate?
43. What is Hibernate Framework?
44. What is JPA can you directly implement it?
45. Methods of Hibernate?
46. JPA anotations?

47. What is singleton?
48. How to integrate hibernate in your project?
49. Configuration code for hibernate
50. . How to create immutable class in hibernate
51. Hibernate JPA vs JPA repository
52. Different hibernate objects
53. Difference between mapping and configuration classes in hibernate?
54. Explain the steps to develop a web application using hibernate?
55. What are core interfaces of hibernate ?
56. Difference between hibernate with annotations and hbm.xml files?
57. What are object states in hibernate ?
58. Explain about Session tracking system ?
59. Difference between save and persist method in hibernate ?
60. What are @primary and @qualifier annotations ?
61. Key value of Hibernate
62. Application.properties configuration and * how u ll pass XML in application.properties
63. What all Junit methods?
64. If we need mobileNO. Validating only 9,10,11 digits? How will you do? Which annotation to use?
65. Microservices and web services
66. Why you are cesing hibernate instead of JDBC
67. What in hyber & why in called ORM.
68. What are the differences between get and load methods?

Spring Boot And API

- 1.@requestmapping@ getmapping
- 2.What are the components of springboot
- 3.How you pass your code in your project
- 4.What is the challenges you face in your project how you overcome from that challenge
- 5.How you were fixing the bugs explain the implementation of webservices in your project
- 6.Explain your project Explain your project flow
- 7.Roles and responsibilities in you project Tools and technologies used in your project
- 8.Why used spring MVC for your project?
- 9..REST and SOAP API's
- 10What is spring pool
- 11.Diff between put and patch
- 12.What are Webservices and Microservices.
- 13.Structure of json
- 14.Why json?
- 15.When to use requestMapping and when to use GetMapping?
- 16.What is payload
- 17.Why Rest over Soap? Rest resources
- 18..Difference Between @Controller and @RestController
- 19.What is Bean Life Cycle and what is Spring IOC.
- 20.Which annotation starts the SpringBoot Project.
- 21.Start point of spring boot application
- 22.Spring AOC Spring container Pom.xml

- 23.What is profiling in Spring boot?
- 24.How to set profiles in Spring boot?
- 25.Difference between authentication and authorization
- 26.How to handle exception in Spring boot Dependency injection
- 27.@Qualifier,@Autowired ,@Component,@SpringBoot, requestParam,
- 28.Difference between Spring and SpringBoot.
- 29.Difference between web services and API
- 30.@enable annotation what is the use of this annotation
- 31.Why we create controller what is the use of controller
- 32.@Value annotation
- 33.Security methods in springboot?
- 34.Different types of Web Services?
- 35.How does execution start in Spring Boot?
- 36.How did you use OOPS concept in your project?
- 37.How did you develop end points in your project
- 38.How to create URL How to interact hibernate with spring boot your project
- 39.What is Get and Post method.
- 40.What is MVC routing
- 41.WHY USE SPRING BOOT AND WHY XML FILE OVER JSON
- 42.Microservices And Webservices .
- 43.How you implement email sending services in your project
- 44.How to integrate email API in project
- 45.How you perform debugging in spring boot.
- 46.Junit testing Annotations that you used in your project?
- 48.. Which all API'S you used in your project.
- 49.Why would you prefer STS on other applications.
- 50.What is SOLID principle with advantages?
- 51.Difference between SOAP and RESTFull web services?
- 52.How to expose and consume web services?
- 53.What is Web Services and its type
- 54.What is POSTMAN?
- 55.What are Http methods explain each?
56. Difference between micro services and monolithic applications?
- 57.What is Maven?
- 58.What is Spring Initializer?
- 59.What is Unit testing?
- 60.What is Junit?
- 61.What are Spring IOC and Its type?
- 62.What is spring security?
- 63.What are JPA annotations used in your project explain each?
- 64.What are spring boot annotation used in your project explain each?
- 65.What is Dependency injection?
- 66.Types of Autowired and explain each?
- 67.Difference between @Autowiring and @Bean?
- 68.What is @Qualifier and @Services and @Component and @Value and @Query ?
- 69.Explain @SpringBootApplication?
- 70.Difference between Bean factory and ApplicationContext
- 71.Session management in spring boot?

- 72.How to create session object?
- 73.What is caching and hibernate and explain 1st
- 74.level and 2nd level caching?
- 75.What are Core interface of hibernate?
- 76.What is Jenkins?
- 77.What is JIRA?
- 78.How to read application. Properties in any class?
- 79.What are response codes of POSTMAN? 200/201/204/400/401/403/404/405/500/503
- 80.. Explain types of spring bean scope?
- 81.What is Actuator in spring boot?
- 82.What is Starter tag in spring boot?
- 83.What is mean by URL, URI, URN explain all and also difference between them
- 84.How to handle exceptions in Spring MVC Framework?(@ExceptionHandler).
- 85.Which one will you prefer among spring and springboot to create a program from scratch?
- 86.JSP lifecycle?
- 87.What are the JSP implicit objects?
- 88.What are the different tags in JSTL?
- 89.Explain the jspDestroy() method
- 90.Define webservice and microservices briefly?
- 91.What methods were you using in REST?
- 92.What is spring boot starter?
- 93.Spring Boot Actuator Features
- 94.Different errors codes like 404,400,500,200?/ 202/201/204/400/401/403/404/405/500/503
- 95.Lazy loading v/s Eager loading?
- 96.Spring MVC?
- 97.Microservices v/s Monolithic architecture?
- 98.Strule of cycle
- 99.What is spring boot, how etc work
- 100.Benefits of Spring Boot
101. What is spring security?
- 102.spring boot Annotation explain? Spring boot application (IMP)
- 103.What is spring IOC? Types
- 104.MVC Architecture?
- 105.Web services?
- 106.What is Singleton design pattern?
- 107.Explain Servlet lifecycle?
- 108.Why we use spring boot framework?
- 109.How to configure database in spring boot project?
- 110.What are the types of Autowire?
- 111.Spring boot project flow?
- 112.Spring Vs Spring Boot(Advantages, Disadvantages, Which one isbetter).
- 113.Spring Initializer
- 114.Spring Acuator.
- 115.Advantages of Spring MVC over other framework
- 116.What is Junit testing
- 117.What is mocking
- 118.Write test case in Mockito , mock MVC, integrity testing
- 119.Explain REST API

120.How to implement REST API

121.What is http

122.What is frame .

124.How to authenticate application ?

125.@springBoot @cross origin @bean @response body

126.How to explore JSON object

127.@SpringBootTest explain

128.Difference between @Configuration and @AutoConfiguration

129.@Component and @Service Difference

130.@Mock annotation explain

131.@Qualifier annotation

132.How to consume query parameter

133.Classes used to consume JSON object

134.Why to go with Microservices Architecture

135.How you implement microservices in your project.

136.Microservices features

137. Suppose we have 4 microServices A,B,C and D and if c is down or have some bugs how to tackle this situation?

138.How to handle exceptions in hibernate and spring boot

139.How to do itext pdf configuration

140.. Exception handling

141.How to achieve many to many mapping in spring boot

142.JSTL and in built objects in JSTL

143.Is it possible to change default port number

144.How to integrate email API in project

145.Design patterns : Singleton , prototype

146.JBOSS architecture

147.How to exclude in spring boot ?

148.Types of bean scope

149.Types of Auto wiring

150.Key components of spring boot

151.Which is the starting point of your applications (explain flow)

152.Modes of auto wired

153.What is server validation and Client validation

154.HTTP methods in spring boot ?

155.OAUTH2, pact tool ?

156.What you will do if micro service fail ?

157.Different springBoot scopes

158.Load balancing

159.Circuit breaker

160.GIT HUB repository

161.Front controller

162.@PathVariable

163.Trust full API ?

164.Difference between Web server and Application server

165.How to test Web service in postman ?

166.How to connect two tables in spring?155

167.What is Inter Servlet connectivity ? (ISC)

- 168.Explain about request dispatcher ?
 - 169.Explain about Entity classes ? (JPA , POJO)
 - 170.Explain about spring bean ?
 - 171.Why we use xml files over JSON ?
 - 172.What are the errors in postman . Explain about each ?
 - 173.What is dispatcher servlet , how it works ?
 - 174.Types of waits
 - 175.@Eureka Spring security
 - 176.What is HTTP servlet?
 - 177.Why do we use Request Dispatcher?
 - 178.Difference between jsp and Servlets? How to configure database
 - 179.Jsp life cycle? Servlets lifecycle? What is Servlets? What is MVC pattern?
 - 180.What are the gags in jsp ? Explain it
- //page 172
